

End-to-End Throughput Speedup on RTX 5090

Dense NVFP4 4:8 Sparse BF16 4:8 Sparse NVFP4

MaxViT End-to-End Forward

DINOv3 Speedup vs. Batch Size

Speedup is relative throughput versus the dense baseline at the same batch size. MaxViT uses batch 128 except Large batch 16; DINOv3 shows the measured batch sweep.
